

Stewardship Personal Values Portfolios[®]

Enhanced ESG Models

Invest Your Values

Seasons of Advice is pleased to offer clients a way to align their investments with their personal values. Our Stewardship Personal Values Portfolios are designed to seek attractive returns while investing in companies that reflect a concern for the social and environmental issues facing our world.

Taking Environmental, Social and Governance (ESG) investing to the next level

Values-based investing is not new. Once known as socially responsible investing, today it has expanded beyond ethical investing mandates to recognize many ESG factors that can be key drivers of value.

In addition to aligning with a client's sense of responsibility to the earth, its inhabitants and the environment, responsibly managed companies are often better positioned in the competitive marketplace – and better able to provide strong long-term growth.

Today more than
\$1 trillion in assets
are invested in
ESG funds.
