

Stewardship Personal Values Portfolios®

Our Investment Approach

The Stewardship Personal Value Portfolios are a diversified range of actively managed, multi-asset class model portfolios featuring enhanced SRI strategies. Utilizing a combination of mutual funds, ETFs and individual securities, the portfolio has been filtered for above-average or better Morningstar Direct® sustainability ratings, as well as an enhanced screening for controversial weapons, palm oil, small arms, thermal coal and tobacco. Candidate investments are further subjected to fundamental analysis before being added to the portfolio in compliance with Global Investment Performance Standards® (GIPS).

Growth of Socially Responsible Investing

Individual and institutional investors are increasingly seeking to align their investment decisions with their values or missions while meeting their financial goals.*

This presentation is not an offer or solicitation to buy or sell securities and may not be construed as investment advice and does not give investment recommendations. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client or prospective client’s investment portfolio.

Historical performance results for investment indices and/or categories generally do not reflect the deduction of transaction and/or custodial charges, the deductions of an investment management fee, nor the impact of taxes, the incurrence of which would have the effect of decreasing historical performance results.

The investment return and principal value of an investment will fluctuate; thus an investor’s shares, when redeemed, may be worth more or less than their original cost.

Investment decisions always should be made based on the investor’s specific financial needs and objectives, goals, time horizon, and risk tolerance.

The asset classes and/or investment strategies described may not be suitable for all investors, and investors should consult with an investment advisor to determine the appropriate investment strategy.
